

# Training for future Data Protection Officers

2 days EU Data Protection  
+  
2 days tasks of the DPO  
+  
1 online exam

The GDPR requires for a DPO professional qualities and expert knowledge of data protection law and practices and the ability to fulfil the article 39 tasks (\*). In this four day course CRANIUM Campus prepares you for the DPO role. The first two days you will get to know the GDPR and other laws that play on a European level. The last two days will be focussed on applying this in a practical way. Every day is full of exercises, real life examples, group discussion and exam sample questions.

## Key Takeaways

- Ready-to-use templates for your DPO role e.g. register, processor agreement, notice text, consent text, DPIA
- Instructive examples: put GDPR into practice
- To-the point answers on your specific questions
- A positive starting vibe

## Audience

- Chief Privacy Officers
- Privacy Professionals
- Legal Compliance Officers
- Risk Managers
- Security Officers
- Security Managers
- CISSP/CISM/CISA certified professionals
- Data Protection Officers

## Participants

Since we highly value interaction and learning from each other we limit the size of the group to:

**20**  
participants

In case a course is fully booked, we will organise a new training as soon as possible in the same city.

## Program

### Day 1 and 2

- Introduction into the privacy legislation and historical background
- Current national legislations vs. the GDPR to come
- Exploring the different types of personal data:
  - Personal data vs. sensitive data
  - Anonymised personal data vs. pseudonymised personal data
- Defining and qualifying the three main actors in data protection: controller, processor and data subject
  - How to qualify?
  - What's a joint controller?
  - What is their respective role?
- How to process data lawfully?
  - What are the legal grounds to process data?
  - The other basic principles explained
- The new legislation into GDPR
  - Overview of the different data subject rights
  - The need for a register, a DPO and a Data Protection Impact Assessment
  - Data breaches: how to define and what to do?
  - A word on codes of conduct and certifications
  - The role of the national data protection authority and the supervisory authority
- International transfer of data

### Day 3 and 4

- Your DPO role: DPO in GDPR, privacy management, awareness and training
- The privacy principles applied: lawfulness, fairness, transparency, purpose-limitation, data-minimisation, accuracy, storage limitation, integrity and confidentiality
- Building the register including examples of common operations
- Formalities: notice, consent, data subject rights, data processor agreement
- ISO 27000 applied to the processing of personal data
- Privacy by Design and by Default, Data Protection Impact Assessment
- Compliancy: certification, infinite data protection, code of conduct
- Data breaches: from definition to daily management

(\*): If you work as external DPO, you are a data processor (ref art 38.2: access to personal data). Data processors can be certified according to art 42.).

## Trainers

Magali Feys

Magali teaches since 2012 international aspects of IP, IT and Data Protection Law at KULeuven. As a lawyer she advises her clients in complex matters of data protection since 2008.

Magali is a top-lawyer in Privacy & GDPR and well-appreciated for her pragmatic approach. She holds a master's degree in law, a master in Economic Law (option Company Law and Financial Law) and another master in intellectual property law. In addition, she obtained a post-academic certification for the course "Life Sciences and Biomedical Technologies". Magali specializes in all aspects of intellectual property, information technology and data protection law and deals with matters of e-commerce, consumer protection and unfair market practices. She is business-coach at the Microsoft Innovation Center Flanders, StartIt@KBC & Vlerick Business School. Next to this she is part of the legal work group e-Health at the Cabinet of Minister Maggie De Block and president of the subworkgroup on mobile health. Magali is also a trained DPO.

Bavo Van den Heuvel

Bavo trained many hundred DPO's and worked as DPO in more than 50 organisations since 2004.

Bavo is an internationally recognised authority in privacy and data protection matters. He is commercial engineer, FIP at IAPP, CIPP/E, CIPM, CIPP/IT, ISO27001 Lead Auditor and Forensic Computer Auditor. He is founder and Director of Product Innovation at CRANIUM Belgium NV. Next to that he was co-founder in 2012 of a training institute where he trained more than 400 future DPO's till May 2017. He has been a Data Protection Officer since 2004. Bavo is regularly asked to speak on international conferences and already gave more than 100 trainings in data protection. Translating the data protection needs between legal/business and IT-(security) people is his daily challenge!

## Practical

The trainings take place everyday from 8h30-12h30 and 13h30-16h30. Doors will be opened at 08.00. The venues are easily reachable by public transport and there is a parking nearby.
