

## ABOUT US

Cranium is a One-Stop-Shop for helping customers in Privacy, Data Protection and Information Security. We are experts in making privacy & information security valuable for trustworthy organizations and people. Towards our customers, partners and employees our values always focus on striking a balance between a passion for winning and a passion for people.

### Passion for Winning

**Deliver on commitments and go further.**

**Excel on results.**

**Take ownership**

### Passion for People

**Develop people**

**Open communication**

**Involvement**

**Build up trust and respect**

**Integrity**

## Roles and Responsibilities

As an **Information Security Consultant** your key responsibility is to raise awareness and advice clients on matters related to information security and legal aspects of privacy and data protection.

Responsibilities include:

- Evaluating the privacy and data protection practices and IT environments of clients, conducting interviews, analysing business processes and reporting to stakeholders;
- Raising awareness within organizations and amongst customers;
- Assisting in the creation and execution of a tailor-made security/ and/or privacy framework and implementing a given strategy for privacy, data protection and information security;
- Advising on both technical and legal aspects of privacy or other IT legal issues and looking for compliant but workable solutions;
- Writing blogs and newsletters on security and privacy related topics;
- Contributing to the Master Program by giving presentations and coaching new employees.

## Desired Skills and Experience

- You (will soon) hold a **Bachelor or Master** degree in applied economics, commercial sciences or commercial engineering, information security, industrial engineering or computer sciences;
- You are naturally ambitious, highly motivated and looking for the perfect transition from student to work life;
- A first experience in IT (IT governance, IT project management or information security), basic knowledge of and affinity with IT forensics and security certificates (CISSP, SANS, CEH, ISO 27001/ CISM/CRISC) is an asset; You will have the opportunity to be trained on these domains;
- Knowledge of BPMN is an asset.

Furthermore, you:

- Have an affinity with the legal aspects of privacy, data protection and information security and are interested in various industries;
- Are client focused and keen on close collaboration with the client;
- Are a real team player, are able to adapt easily to modifying circumstances and love new challenges;
- Have strong communication skills in **English and the local language of the country you are applying for**, any other language is a plus;
- Are result oriented and not afraid of taking initiative;
- Are flexible and eager to learn.

## OUR OFFER

The Cranium Applied Privacy Consultants are appreciated for their professional skills and expertise. We offer you an attractive and motivating **compensation package** and continuous support in your professional development.

You will participate in a **Master Program in Applied Privacy** and receive on the job training from highly appreciated IT security experts, where obtaining **international certificates** are supported.

Furthermore, we offer you:

- A highly varied role that involves working in a supportive, young and dynamic team;
- An adventure in the cutting-edge field of Applied Privacy in an international environment.

- Great variety in type of clients and day-to-day business;
- Real career growth opportunities;
- Great colleagues in a joyful environment.

**Interested ? Send your cv to [careers@cranium.eu](mailto:careers@cranium.eu) and we'll respond to you as soon as possible.**

**We hope to meet you soon.**
